

Avimark® version 24.11.2 Release Notes

WHAT'S NEW

Antech

For clinics on Avimark version 24.10.0 who updated to the Antech Immersion experience, they will now have the ability to switch back to the previous Antech experience. The Antech integration can be switched back to the previous integration in Advanced Options. Set Antech V6 to False, then select Antech V1 and set it to True.

Requisitions

The requisition order process provides the capability of holding off sending a requisition until all tests have been added. This process is for all lab companies with the exception of AXIS-Q and IDEXX IVLS.

Send a Requisition through Medical History

Delay sending a requisition through Medical History.

 If a treatment linked to a lab company is added to a patient's Medical History, a prompt will display if the requisition should be created and sent.

Confirm	×
On Wo	e or more "History Entries" have a "Zoetis Reference Lab". uld you like to create and send a Requisition for the lab?
	Yes Don't Send No

Notifications

Notifications will get sent to Avimark when lab results are available for download. Or if an add-on was added through the Zoetis portal for requisitions that started in Avimark.

Requisition Management

Requisition Management provides you with the option to go to Requisitions to edit a requisition and add on additional tests. You can also go to Download Requisitions to import orphaned results.

Updated Legend

•	Labs displayed in the color orange represent orphaned results.	Lab Unassigned Resend Patient Unassigned Updated Done	11.1
•	Zoetis labs updated through the Zoetis portal will show in a teal color to indicate the lab was updated.		

Edit Zoetis Requisitions

From within Requisition Management, add tests to an already Sent Zoetis requisition.

• On the Requisitions tab, right-click on a Sent requisition and Edit Requisition to add tests to a sent requisition.

Note: The Check Updates button can be used to see if there were any updates made to sent requisitions via the Zoetis portal. However, it is recommended that all updates to sent requisitions be made in Avimark.

Import Orphan Results

Orphan results are those labs that did not have results imported automatically.

• From the Download Requisitions tab, right-click × Import Zoetis Requisition #9064169 **Requisition Information** on a requisition that did not get imported and Client Name: Grace _Benjamin Folsum 11/19/2024 12:34:32 AM Ordered at: choose Import Requisition. Patient Name: Fiona Client, Patient Doctor --- DNS: David N. Sharp, DVM Folsum, Grace and Benjamin, Fiona • If necessary, click the ellipsis button next to -Code Description Cost Client, Patient to search for the client and 25000493 ZRL Metabolic 65.9 patient the results should import to. Import & Link to Treatment: • 25000493 Metabolic Bundle, Canine/Feline (Price: 69.30) O Create a New Treatment • You can choose to Import & Link to Treatment (or Code Description Cost Create a New Treatment). SIMULATE SIMULATE 10 Import & Link to Treatment: You can choose not to import if the charge capture was already done for the test. OK Cancel

Scale Window

Adjust the size of the Avimark program window.

- Click on the Covetrus[®] icon in the upper-left corner of the program window.
- Click on Manage Layout > Scale Window.
- Zoom in or zoom out by selecting a scale percentage.

Avimark extras

416276	Resolved AXIS-Q results not auto-importing.
414730	Corrected the Wellness Plan and Health Plan reports so they show correctly if included services are over two.
362266	Rabies vaccine information will print on a document after invoicing.
416548	Improved the program to retrieve orphan results for Zoetis/Greywind.
407350	The reference lab API request was written to advanced logging.
416566	The program will scan Medical History for requests not sent before sending additional tests.
416049	Corrected entry history for analytes with notes.
418481	Improvements were made to sending email tests and the Advanced Options editor.
413302	Renamed and reworked View Requisition and Download PDF right-click options.
416031	Added the top 10 searches to Avimark.
418281	Removing Treatments or Requisitions from Medical History will work properly when it belongs to a deleted Greywind partner.
416195	Added an Advanced Option to disable seeing the Notification window for users.
416401	Improvements were made to importing test results.
416194	Added a checkbox to lock the Notifications window in place.

ADDITIONAL RELEASE ITEMS

316153	Allocated quantity will update correctly when an item is deleted from Medical History, then undeleted and posted.
417436	Reworked deleted/declined labs from Medical History.
406856	Users are now able to add columns to the Patient Wellness Plans window.
413206	Corrected range check error when printing the deposit slip for all sites.
406244	When clicking in a section on the medical condition record, the cursor will be placed at the bottom of the notes.
373416	Markup of treatments and/or items the new prices will be reflected in a new generation of the Wellness Plan.
74449	Posting from an Estimate to the Whiteboard on a treatment with a quantity of one but count of two, posting to Medical History will charge the correct price.
420344	When sending Covetrus Comms messaging, it will now pull the user logged in for the By field.
421024	Users will be allowed to change the code without a prompt when the Medical History entry isn't saved.
417554	If the user goes to the Requisition Management window from the test window by selecting Import from, Requisition Management will not give an access violation error.
420921	Include Users and Include All Sites will now hold when these options are checked in the right-click menu option for the doctor drop-down.
420581	Doctor's instructions will now auto fill when using the format *code* in the Dr Instruction window.

ADDITIONAL RELEASE ITEMS

64020	When an item is being filled outside Avimark, changes on-hand and allocated quantity will not be impacted.
421021	Posting an estimate with obsolete treatment will not generate an error and will still go into Medical History.
419265	When the Patient Health Plan in Medical History has an empty link to the health plan, it will not create an Access Violation error.
422554	Apply reminders in Scheduled Tasks will only perform the task once.
423959	Added the ASAP 4.2A for Connecticut controlled substance report.
417896	Resolved the range check error when printing a drug label.
423411	Resolved the ability to clear the breed association for Antech.
424629	Cleared the Chromium user folder error in 24.11.1.
424417	Corrected the ability to run sqlitexport utility through the command line.
423321	Print&Email Scheduled Task is now updating the Start/End dates.
412961	The Spellcheck options window opens to the correct window.
420974	Users can Save a note on a Medical History entry while another user is posting to Accounting.
422079	Drug Label still saves all information except the Label Note for Medical History that another user is posting to Accounting.
422316	Clicking Cancel in Drug Label window should not impact the number of refills.

ADDITIONAL RELEASE ITEMS

388352	Discount added to Item from Medical History that does not have the "A" action code will not revert back to the original price after adding drug label to Item.
423260	Do not save non-rich text as rich text in notes.
