# DICOM CLIENT CONFORMANCE STATEMENT

## Overview

This Conformance Statement specifies Impromed's compliance to the DICOM 3.0 Standard.

## Remarks

The fact that a product has a DICOM Conformance Statement that is complementary to that of the Impromed DICOM Client does not in and of itself guarantee interoperability between said product and the Impromed DICOM Client. The comparison of Conformance Statements is a step to determining interoperability but other steps are required including:

- Analysis of interoperability requirements of communicating applications
- Creation of a Test Plan to verify interoperability
- Execution of the Test Plan

DICOM is an evolving standard, constantly being amended and augmented. In consideration of this fact, Covetrus reserves the right to make changes to the Impromed DICOM Client as it sees fit to keep abreast of these changes.

Implementation Version Name	InfinityDS 1.0

# Association Acceptance and Association Initiation

## Communication Verification

### Association Acceptance Policy

A SCU may verify the existence of the Impromed DICOM Client by initiating an association with the Verification Service Class and sending a C-ECHO request.

### Accepted Presentation Contexts
